

Year 4 Homework

6th November 2025

Dear Parents and Carers,

Welcome back to the second half of term. We've had another exciting and productive week in Year 4!

The children have now started rehearsals for our Christmas concert, and the songs are already sounding fantastic. There's a real buzz of festive excitement beginning to build!

In maths, we've been learning all about the properties of 2D and 3D shapes. The children have been using their knowledge to create and name shapes and will next week be designing some 3D shape models using *Tinkercad* — ready for 3D printing! It's been wonderful to see their creativity and problem-solving skills in action. We have also been revising multiplying and dividing by 10 and 100. Homework is linked to this skill.

In literacy, we've been exploring the purpose of adverts and how they are designed to persuade an audience to purchase a product. The children are now planning and creating their own TV adverts for a brand-new product for Mr Wonka — and their ideas are as imaginative and chocolate-filled as you might expect!

Spelling

angrily	finally
bossily	happily
cheekily	nicely
automatically	merrily
comically	sadly

Math

Homework this week is on SumDog. Please encourage your child to complete their homework. It is beneficial for their learning and progress.

Diolch yn fawr
