

## Year 4 Homework

20<sup>th</sup> November 2025

### Dear Parents and Carers,

In Maths, the children have been learning how to use **grid multiplication**, becoming more confident at setting out calculations and explaining their methods clearly. They have shown great determination and growing independence. Our **Christmas concert rehearsals** are well underway, and the children are working hard to learn their lines, actions and songs. I am very proud of their enthusiasm, confidence and teamwork. In preparation for the **Christmas Fayre**, the class have been creating some delicious delicacies to sell. They have shown fantastic creativity and care in making their treats look festive and appealing. We will also be making a craft item nearer to Christmas for the children to keep.

We have continued our vibrant **Pop Art work**, exploring bold colours and patterns to create eye-catching designs of food. In Literacy, we discussed **good and bad choices** made by characters in *Charlie and the Chocolate Factory*, thinking carefully about behaviour, consequences and how authors help us form opinions about characters. In Science, we carried out a hands-on **investigation**, predicting, observing and recording our results like real scientists.

**Spelling words are the same as last week as most children found these particularly tricky so we need to revisit them for a second time. Please take time to help your child learn these words.**

### Spelling

slowly	busily
beautifully	usually
easily	friendly
loudly	lonely
quietly	cuddly

### Math

Homework this week is on paper and should be returned to school on Monday.
